

Evaluate the Extended Definition Project

1. Tell me what you believe is the *purpose of this assignment*. Why do you think I assigned something this complicated? What do you believe was *my ultimate objective*?

2. Which new sites did you discover?

List them below:

What can one find here?

- | | |
|----------|-------|
| a. _____ | _____ |
| b. _____ | _____ |
| c. _____ | _____ |
| d. _____ | _____ |
| e. _____ | _____ |

3. Make some observations about court cases:

4. Someone has said, "There is no given proof to a value; we can evaluate its usefulness, its strength, its utility, its applicability." So did you do that? Which of these statements reflects your work and the product your produced?

- _____ Did not attempt the problem
- _____ Only copied information and didn't read anything I copied.
- _____ Wrote something but am pretty sure it is not correct or well written.
- _____ Wrote a definition that I am hopeful is correct and well written.
- _____ Wrote a proof that I am pretty confident is correct and well written.

5. Is a value simple to define? No. So, why do you believe so many ways of defining have come into existence?

6. Why are *illustrations* power, yet not "the best proof" to use in debate?

7. What was *enjoyable* about the project?

8. What was *difficult* about the project?

9. What was *painstaking* about the project?

10. What are three *interesting* things you learned by doing the project?

11. Were you able to help a classmate? How?

12. This assignment was very specific. Why, then, do you believe there were so many questions?

13. How would you *change/differ* in your *approach/process* if you were to start the project again?

14. After completing the project, what did you learn about your value that you didn't know before? What would you still like to find out? (Use back if necessary)
